

Bathtub Refinishing Services

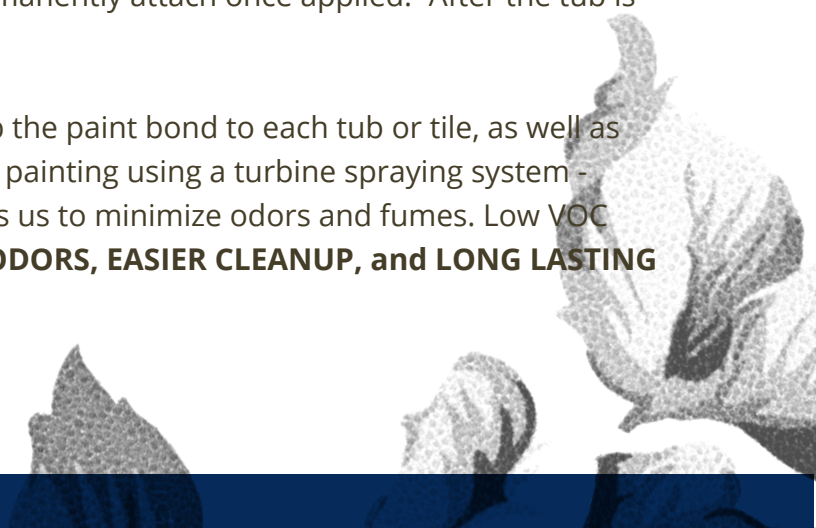

Our Work

Nguyen's Refinishing delivers excellent service and bathtub refinishing perfection for our customers.

We specialize in refinishing for bathrooms, with extensive experience with paints and finishes. Along with the service team, our owners regularly provide quality inspections to ensure that attention to detail is consistent and will meet customer expectations.

Preparation is most important part of the refinishing process: It is the key to a long lasting, durable finished tub. Therefore, a majority of the work is spent cleaning; using bio-degradable solutions that remove any dirt, debris, soap scum, mildew, stains, and creases from the tub. The original glaze is also removed for coatings to permanently attach once applied. After the tub is treated, we begin the spraying process.

Applying a bonding adhesive primer first will help the paint bond to each tub or tile, as well as prevent any peeling. When this is done, we begin painting using a turbine spraying system - rather than a compressed air spray - which allows us to minimize odors and fumes. Low VOC paints are used for **CLEANER AIR, NO STRONG ODORS, EASIER CLEANUP, and LONG LASTING DURABILITY.**

Our Understanding

Your customers and tenants will never have to think, or complain, about the condition of their bathroom.

At **NGUYEN'S REFINISHING**, we don't just maintain basic standards - we go above and beyond. We have the knowledge and experience to prepare any surface to paint with high performance coatings, that which can increase the value of your property. Along with our work, we believe that building long-term mutually beneficial relationships with our clients and our employees is important, ensuring that everyone has an enjoyable and rewarding experience with our company.
